Elva in Taiwan!

Workshop on EcoTourism July 4th - 17th 2024

"I would like to extend my heartfelt thanks to the Taiwan ICDF for the incredible opportunity provided to me. This experience has been both enlightening and enriching, especially since it was my first time traveling such a long distance.

Firstly, the lectures I attended highlighted how the people of Taiwan have developed their country with great dedication.

The sense of community engagement in Taiwan caught my attention. I was impressed by how everyone participates in activities and development together. For instance, during our visit to the Gangkuo community, we engaged in traditional fishing. It was heartwarming to see everyone involved, and at the end of the day, everyone took fish home to their families."

"The cleanliness of Taiwan is impeccable and truly stood out to me. I was amazed by how clean the environment was, from the trains to the streets, despite the absence of bins. This demonstrated the deep respect and love the people have for their country.

Most importantly, the emphasis on safety in Taiwan left a lasting impression. The people are incredibly helpful, ensuring that visitors are safe and well-guided. I felt secure at all times, no matter the hour, which I truly appreciated.

Lastly, Taiwan's commitment to eco-tourism is admirable. Everything they do benefits the local community, and nothing goes to waste. I hope my small island of St. Lucia can learn from Taiwan's example and embrace our own potential more fully.

Once again, thank you, Taiwan. I miss you already and commend you for your outstanding efforts in educating different countries, which plays a significant role in addressing climate change. I look forward to seeing you again."
